IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re\ Application of: Brian Keenan & Milivoj Vujic

Appln. No.: 09/744,351

Based on PCT/AU99/00562 Filed July 8, 1999

For: INSULATION MODULE

FOR VESSELS

(Atty. Docket No. 24748 USA)

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first-class mail, postage prepaid, in an envelope addressed to: Commissioner for Patents, Washington, DC 20231 on July 31, 2002.

Dawn M. Larsen

INFORMATION DISCLOSURE STATEMENT PURSUANT TO 37 CFR 1.97(b)

Commissioner for Patents Washington, DC 20231

Sir:

Applicant hereby requests that the enclosed information items be considered as part of the examination of the application. A list on Form PTO-1449 is attached hereto. A copy of each information item is enclosed.

Pursuant to 37 CFR 1.98(a)(3), applicant herewith submits a concise explanation of the relevance of the information items not in the English language.

Based upon a review of Figures 1-4, French patent document 1,159,733 (information item AM) discloses a means for insulating piping having an elongated outer shell 1 covering an inner insulating layer 2, the shell being split longitudinally into arcuate halves and having flanges 3 or lips 6 for attachment of the halves together.

Based upon a review of Figures 1-3, French patent document 2,704,930 (information item AN) discloses a method of making insulating components for insulating pipes 1.

Based upon a review of Figures 1-9, French patent document 2,752,191 (information item AO) discloses a multilayer composite material for use as insulation.

Based upon a review of Figures 1-7, German patent document 37 30 357 (information item AP) discloses means for insulting piping 8 comprising an outer shell 1 with an inner insulating layer 3 surrounding the piping 9.

Based upon a review of Figure 1, German patent document 297 06 323 (information item BL) discloses a means for insulating piping having an outer shell 3 surrounding an insulating layer 1. The insulating means is split longitudinally into halves and has a means 4, 6, 7 for attaching one half to the other.

Respectfully submitted,

SYNNESTVEDT & LECHNER LLP
